44-121 Gliwice, ul. Łabędzka 21

(1) TYPE EXAMINATION CERTIFICATE

- (2) Equipment, components and protective systems intended for use in potentially explosive atmospheres. Directive 2014/34/EU of the European Parliament and of the Council of 26 February 2014.
- (3) Type examination certificate No: **OBAC 19 ATEX 0064X, Issue 2**
- (4) Product: **Radial fans type EBA-...**
- (5) Manufacturer: **Venture Industries Sp. z o.o.**
- (6) Address: **ul. Mokra 27, 05-092 Łomianki-Kiełpin**
- (7) This equipment, product or protective system and any acceptable variation thereto is specified in the schedule to this certificate and the documents therein referred to.
- (8) Osrodek Badań, Atestacji i Certyfikacji OBAC Sp. z o.o. (The Institute for Research and Certification „OBAC”) certifies that this equipment, component or protective system has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment, component or protective systems intended for use in potentially explosive atmospheres given in Annex II to the European Council Directive 2014/34/EU.
The examination and test results and the list of agreed technical documentation are recorded in the confidential Report no. OBAC/24/ATEX/0298.
- (9) Compliance with the Essential Health and Safety Requirements has been assured by compliance with:
PN-EN ISO 80079-36:2016-07 **PN-EN ISO 80079-37:2016-07** **PN-EN 14986:2017-02**
(EN ISO 80079-36:2016) (EN ISO 80079-37:2016) (EN 14986:2017)
- (10) If the sign „X” is placed after the certificate number, it indicates that the product concerned is subject to specific conditions of use specified in the schedule to this certificate.
- (11) This certificate is valid from **31.07.2024** until **30.07.2029** and relates only to the design, assessment and tests of the specified equipment according to the Directive 2014/34/EU. The certificate does not apply to further requirements of the Directive relating to the manufacture and placing on the market of this equipment.
- (12) The marking of the equipment, component or protective system must include the following:

 II 2G **Ex h IIB+H₂ T3 Gb**

 II 2G **Ex h IIB+H₂ T4 Gb**

 II 2D **Ex h IIIC T125°C Db**

Head of Certification Body

(13)

SCHEDULE

(14)

**to the Type Examination Certificate
No. OBAC 19 ATEX 0064X, Issue 2**

(15) Ex product description:

Radial fans type EBA are driven directly by a motor mounted to the fan's structure, located outside of the pressure area, with direct cooling on the motor shaft. The device constitutes an assembly of mechanical and electrical components marked with Ex designation, and of additional electrical elements. Depending on the model, the speed of the fan may be adjusted through changing the supply frequency.

In the EBA-type fan series, electric motors with a temperature class adapted to the temperature class of fans, holding the following certificates, are approved for use:

JSHP 23 ATEX 0005X	OBAC 14 ATEX 0047X	CESI 03 ATEX 280X	CNEX 17 ATEX 0004X

EPT 19 ATEX 3409X			

Marking:

EBA – ... type centrifugal fans

have the designation EBA-a-bc-d, x, y, z, v where the individual letters indicate:

EBA – fan type

a – number of motor poles and number of speeds

b – fan size

c – number of phases (S – single-phase, T – three-phase)

d – device category (2G, 2D, 2GD)

x – figure of the fan (LG..., RD...)

y – voltage of the fan (up to 690V)

z – supply frequency

v – inverter control (VFD)

Rated data:

The rating data of the fans are presented in the manual No. EBA-2019-V1 and the design documentation DP/EBA/2019 of 08.01.2021, along with Annex D of 20.12.2023.

(13)

SCHEDULE

(14)

**to the Type Examination Certificate
No. OBAC 19 ATEX 0064X, Issue 2**

(16) Report:

- OBAC/24/ATEX/0298.

(17) Specific conditions of use:

- The fan structure should be grounded in its mounting location in order to ensure static electricity outflow.
- The fan's electric motors must be protected against short-circuits and overloads in accordance with the requirements of EN 60204-1.
- The permissible ambient temperature range for the unit is -50°C to $+80^{\circ}\text{C}$ or narrower according to the fan nameplate and the temperature class of the electric motor used, and the medium temperature on the inlet shall be between -20°C and $+60^{\circ}\text{C}$.
- It is mandatory to equip category 2D fans with a vibration monitoring system. The control system or that part of it to which the vibration sensor will be connected must meet the requirements of ignition prevention type "b1" in accordance with chapter 6 of EN ISO 80079-37:2016-07 concerning the ignition source monitoring system. The performance parameters for the implementation of the ignition prevention system are specified by the fan manufacturer.

(18) Essential health and safety requirements:

Met by compliance with the requirements mentioned in item 9.

(19) Certification history:

OBAC 19 ATEX 0064X, of 31 st July 2019.	Type-examination certificate valid from 31.07.2019 to 30.07.2024.
Schedule no. 1 to the certificate no. OBAC 19 ATEX 0064X, of 18 th January 2021.	Extension of the fan type-series, concerning changes related to the design, parameters and design for use in dust atmospheres, was included in the documentation of 8 January 2021.
Schedule no. 2 to the certificate no. OBAC 19 ATEX 0064X, of 6 th February 2024.	Extension concerning the number of types of motors used in fans
OBAC 19 ATEX 0064X, Issue 2, of 31 th July 2024.	Extension of validity of certificate No. OBAC 19 ATEX 0064X, along with changes included in the appendices. Certificate valid from 31.07.2024 to 30.07.2029.
